Call for Abstracts

Applied Digital Health

Bridging Research and Real-World Applications

Track at the 18. Forschungsforum der österreichischen Fachhochschulen

07.05.-08.05.2025, FH CAMPUS WIEN

http://www.fh-campuswien.ac.at/forschungsforum

The 18th Research Forum of Austrian Universities of Applied Sciences will be held under the theme "Doing Research – Shaping the Future."

We invite researchers in the field of Applied Digital Health to submit abstracts of their recent research specifically related to the topics outlined below.

1. **Emerging trends in Digital Health**
   This session focuses on the latest advancements and innovative directions in Digital Health that are shaping the future of healthcare.
2. **Chronic disease management using digital tools**
   This session will explore the integration of technology in managing chronic diseases, focusing on how mobile apps, wearable devices, and telemedicine are transforming patient care.
3. **Digital health and the patient/user**
   This session addresses the intersection of digital health technologies and patients/users, focusing on patient perceptions and acceptance, competencies in using Digital Health tools, promoting engagement and self-responsibility, balancing patient desires with solutions in product development, workplace health promotion, and ethical implications.
4. **Digital health advancements and strategies in Austria and Europe**
   This session focuses on Digital Health progress and strategies in Austria and Europe, covering innovative methods for health data collection and analysis, the implementation of Digital Health applications from political will to practice, and the role of healthcare professionals in national and international eHealth and telehealth strategies.

This track also welcomes submissions from early career researchers in the allied health professions within an early career sub-session. These researchers are asked to present their recent original research related to the field of Applied Digital Health, but also to provide a brief insight into their academic research career path, including perspectives and obstacles they have overcome.

All accepted abstracts will be published in an abstract volume by Facultas Verlag.

Detailed Call for Abstracts

Please find the full Call for Abstracts online **here.** Please scroll down to our track "Applied Digital Health – Bridging Research and Real-World Applications" for all details.

Criteria for Submission and Presentation

- Language: German or English
- Length: Maximum 3000 characters (including spaces)
- No identifying information about authors should be discernible in the submission text, as submissions will undergo double blind review.
- Selected contributions will be invited to submit an extended paper for publication.

All accepted contributions will be asked for an oral presentation or a poster presentation.

- Presentation: 15-minute oral presentation or 5-minute poster presentation (please specify when submitting)
- Please upload your presentation or poster to ConfTool by April 5, 2025 (access will be enabled after the submission deadline).

How to submit your contribution

Please register and hand in your contribution via the provided online form in our ConfTool here: https://www.conftool.pro/fh-forschungsforum2025
